Professional Summary

Full-Stack Software Engineer with 4+ years of professional experience building web applications and backend services using React, TypeScript, Node.js, and Python/FastAPI. Delivered 5 business-critical applications serving 6,000+ users and developed 40+ RESTful APIs. Specializes in translating business workflows into software, with experience in frontend modernization, database optimization, and multi-tenant authorization.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Python, SQL, HTML5, CSS3
Frontend: React.js, Next.js, Angular, AngularJS, Tailwind CSS, Vite, Responsive Design
Backend: Node.js, Express.js, FastAPI, REST APIs, JWT, Session Management, RBAC
Data: PostgreSQL, SQLAlchemy, MongoDB, Mongoose, MySQL, Redis, Database Design, Query Optimization
Development & Delivery: Docker, Git, GitHub, GitHub Actions, CI/CD, Vercel, Render, MongoDB Atlas
Testing & Practices: Jest, Postman, bcrypt, Helmet, CORS, Rate Limiting, Agile/Scrum, Code Reviews

Professional Experience

Freelance Full-Stack Software Engineer **May 2026 – Sep 2026**
SMS Logistics / CIX Tech (in-house software team) *Remote*

- Built Python/FastAPI backend services for CIX Attendance as part of a team developing a multi-tenant workforce platform from scratch, supporting **3 organizations, 10 locations, and 100+ users**.
- Automated attendance recording and trip data workflows using PostgreSQL, replacing manual attendance processes and enabling real-time reporting for operational reviews before invoicing.
- Implemented server-side role checks and organization-scoped authorization to restrict cross-organization data access and enforce employee permissions across multiple assigned locations.
- Prevented duplicate daily check-ins and automated half-day classification for missing check-outs after a date change, standardizing attendance outcomes.
- Contributed React/TypeScript interfaces to the SMS Logistics website, including responsive Tailwind CSS layouts and a five-step freight estimator integrating geocoding, route distances, and cargo-based vehicle recommendations.

Full Stack Web Developer **Sep 2020 – Jan 2025**
Eazy Refund Consultancy LLP *Hyderabad, India*

- Designed, developed, and maintained **5 business-critical web applications serving 6,000+ users** using React, Angular, JavaScript, Node.js, Express.js, and MongoDB.
- Developed and integrated **40+ RESTful APIs** for business operations, user management, authentication, and third-party integrations.
- Optimized MongoDB queries, indexes, and data retrieval, improving database performance by approximately **30%**.
- Built reusable frontend components and streamlined development workflows, reducing development time by approximately **20%**.
- Modernized legacy AngularJS functionality into React interfaces, improving maintainability and user experience.
- Implemented JWT authentication, session management, password hashing, and role-based authorization for application users.
- Integrated payment processing services into application workflows supporting thousands of annual transactions.
- Mentored **6 junior developers** through technical guidance, code reviews, debugging, and development best practices.

Projects

DevElevate AI — AI-Powered Career Development Platform
Next.js, React, TypeScript, Node.js, Express.js, Redis, Docker, JWT

- Built a full-stack career development platform featuring AI interview preparation, ATS resume analysis, personalized career roadmaps, and interactive coding practice.
- Developed responsive Next.js/React interfaces and Node.js/Express REST APIs to connect user workflows with AI-powered functionality.
- Implemented JWT access and refresh tokens, protected API endpoints, and role-based authorization.
- Configured Docker-based development environments and developed administrative application features.

EventLens — Event Discovery and Management Platform
React.js, Node.js, Express.js, MongoDB, REST APIs, JWT

- Built responsive event discovery, registration, and RSVP workflows using React, with reusable components for different user roles.
- Developed Node.js/Express APIs for event management, authentication, and organizer workflows, backed by MongoDB and role-based access controls.

Full-Stack Developer Portfolio Live Website
React.js, Vite, Node.js, Express.js, MongoDB, JWT

- Built a responsive portfolio with reusable React components to present professional experience, technical skills, and software projects.
- Developed authenticated administrative content management using Node.js, Express.js, MongoDB, and JWT; deployed and maintained the application on cloud hosting.

Education

Master of Science in Computer Science **Aug 2026**
Westcliff University **GPA: 3.9/4.0**
Focus: Web Development
