Sravani Medagam

Full-Stack Engineer | React.js | Next.js | TypeScript | Node.js | AWS
657-631-7877 | sravanimedagam0709@gmail.com | LinkedIn | GitHub | Portfolio

Professional Summary

Full-Stack Engineer with 4.5+ years of experience designing, developing, and deploying scalable production web applications serving 6,000+ users. Proven experience building secure RESTful APIs, responsive frontend applications, and data-driven backend systems using React.js, Next.js, TypeScript, Node.js, PostgreSQL, and MongoDB. Strong background in full-stack architecture, authentication and authorization, database design, performance optimization, AWS cloud deployment, Docker, automated testing, and CI/CD, with hands-on experience delivering reliable software across the complete SDLC.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3
Frontend: React.js, Next.js, Angular, AngularJS, React Hooks, React Query, Zustand, Tailwind CSS, Bootstrap, SASS, Responsive Design
Backend: Node.js, Express.js, NestJS, REST APIs, Socket.IO, JWT, Refresh Tokens, Session Management, Authentication & Authorization, RBAC, Secure Cookies
Databases & ORM: PostgreSQL, MongoDB, MongoDB Atlas, MySQL, Prisma ORM, Mongoose, Redis, Database Design, Query Optimization
Cloud & DevOps: AWS, Docker, Git, GitHub, GitHub Actions, CI/CD, Vercel, Render, Neon, Upstash
Testing: Jest, Vitest, Playwright, End-to-End Testing, TypeScript Type Checking, Production Build Testing
Engineering: Agile Development, SDLC, API Security, Performance Optimization, Debugging, Code Reviews, Production Support, Cross-Functional Collaboration
Tools & Libraries: Postman, VS Code, GitHub Copilot, Monaco Editor, Recharts, Lucide React, npm, Nodemon

Professional Experience

Full Stack Engineer **Sep 2020 – Jan 2025**
Eazy Refund Consultancy LLP *Hyderabad, India*

- Developed and scaled 5 business-critical web applications serving 6,000+ users across tax, compliance, customer onboarding, document management, and payment-processing workflows.
- Owned the end-to-end software development lifecycle, partnering directly with clients and stakeholders to gather requirements, design solutions, deliver features, and support production systems.
- Led the migration of legacy AngularJS applications to React, modernizing frontend architecture and improving maintainability, scalability, and developer productivity.
- Built customer self-service portals enabling users to independently access documents, track service requests, manage account information, and retrieve business resources.
- Architected and maintained 40+ RESTful APIs using Node.js, Express.js, and MongoDB supporting authentication, onboarding, payment processing, workflow automation, reporting, and document management.
- Integrated secure payment gateways and third-party business services supporting thousands of customer transactions annually across multiple platforms.
- Optimized application performance through database indexing, query optimization, lazy loading, and code-splitting techniques, improving responsiveness and scalability.
- Deployed and maintained production applications on AWS, managing releases, monitoring system health, troubleshooting production issues, and ensuring platform reliability.
- Mentored 6 junior developers through code reviews, technical guidance, and knowledge-sharing initiatives while contributing to Agile planning and successful project delivery.

Projects

DevElevate AI – AI-Powered Career Preparation SaaS Platform Live Demo | GitHub

- Architected and deployed a full-stack career preparation SaaS platform using Next.js, React, TypeScript, NestJS, PostgreSQL, Prisma ORM, and Redis, integrating resume analysis, mock interviews, personalized career roadmaps, analytics, and coding challenges.
- Designed secure RESTful APIs and JWT authentication with refresh tokens, secure cookies, and RBAC; implemented persistent PostgreSQL models supporting users, interviews, resume analyses, roadmaps, subscriptions, and coding rooms.
- Developed ATS-style resume analysis with job-description matching and skill-gap detection, role-aware interview evaluation, analytics dashboards, and a real-time coding workspace using Monaco Editor, Socket.IO, and Docker-based execution across 5 programming languages.
- Implemented automated testing and CI/CD using Jest, Vitest, Playwright, TypeScript checks, and GitHub Actions; deployed production services using Vercel, Render, Neon PostgreSQL, and Upstash Redis.

EventLens – Event Discovery & Management Platform Live Demo | GitHub

- Developed a full-stack event discovery and management platform using React.js, Node.js, Express.js, MongoDB, and Mongoose with a responsive interface and RESTful API architecture.
- Implemented session-based authentication, bcrypt password hashing, RBAC, protected routes, event search and filtering, RSVP capacity validation, attendee tracking, organizer dashboards, and PWA functionality.
- Optimized MongoDB queries and application performance and deployed the production platform using Render, MongoDB Atlas, GitHub, and environment-based cloud configuration.

Developer Portfolio Platform Live Demo | GitHub

- Engineered a full-stack portfolio and content management platform using React.js, Node.js, Express.js, and MongoDB, featuring a JWT-secured admin dashboard for dynamic project management, contact inquiries, and visitor analytics.
- Built protected REST APIs, event tracking, GitHub API integration, responsive UI, and SEO metadata; deployed production frontend and backend services using Vercel, Render, and MongoDB Atlas.

Lead.AI SMART Capstone – AI Business Strategy & Product Validation Westcliff University

- Analyzed delayed follow-up, scattered customer inquiries, and missed revenue opportunities for small businesses; contributed to customer discovery, stakeholder analysis, competitive research, project scope definition, assumptions, risks, and research questions.
- Recommended a human-reviewed AI follow-up workflow in which AI supports inquiry organization, response suggestions, follow-up tracking, and business-owner approval, aligning AI capabilities with practical business requirements and adoption concerns.
- Helped identify appointment-based salon and beauty businesses as a focused pilot segment because their customer inquiry workflows are time-sensitive, clearly defined, and measurable.
- Defined success metrics including response time, missed-lead recovery, booking recovery, and approval rate, and contributed to a 90-day roadmap covering pilot setup, workflow testing, measurement, refinement, and expansion planning.
- Prepared weekly milestone reports, executive presentations, case-study documentation, and sponsor-facing deliverables while collaborating through role-based task ownership, progress tracking, and sponsor feedback alignment.

Education

Master of Science in Computer Science – Web Development **Mar 2025 – Aug 2026**
Westcliff University, California, USA *GPA: 3.9/4.0*
