

Sravani Medagam

Full-Stack Software Engineer

United States | 657-631-7877 | sravanimedagam0709@gmail.com

LinkedIn | GitHub | Portfolio

Professional Summary

Full-Stack Software Engineer with experience building scalable web applications using React, Angular, Node.js, and MongoDB. Skilled in REST API development, authentication systems, cloud deployment, and responsive UI design. Strong understanding of system design fundamentals, performance optimization, and secure backend architecture.

Technical Skills

Frontend: React.js, Angular, JavaScript (ES6+), HTML5, CSS3, SCSS, Bootstrap, Tailwind CSS

Backend: Node.js, Express.js, REST APIs, MVC Architecture

Database: MongoDB, Mongoose, MySQL, Indexing, Query Optimization

Security: JWT, bcrypt, express-session, cookies, RBAC, Helmet, CORS, rate limiting

Cloud & Deployment: Render, MongoDB Atlas, Vercel, AWS (basic), CI/CD (GitHub Actions)

Tools: Git, GitHub, Postman, Docker (basic)

Concepts: System Design Basics, Scalable Architecture, SDLC, Agile

Professional Experience

Full-Stack Web Developer

Sep 2020 – Jan 2025

Eazy Refund Consultancy LLP, Hyderabad

- Developed full-stack applications using **React, Angular, Node.js, Express.js, and MongoDB** supporting business workflows.
- Designed RESTful APIs using Node.js and Express.js following **MVC architecture and modular backend design**.
- Implemented secure authentication using **JWT, bcrypt, session-based authentication, and role-based access control (RBAC)**.
- Optimized database performance using **MongoDB indexing, aggregation, and query optimization techniques**.
- Built responsive UI using React and Angular with reusable components and mobile-first design.
- Improved application performance using **lazy loading, code splitting, and frontend optimization techniques**.
- Collaborated in Agile environment with sprint planning, code reviews, and iterative development.

Projects

EventLens – Full-Stack Event Discovery & RSVP Platform

Live Demo | GitHub

- Designed and developed a full-stack single-page application for event discovery, event creation, and RSVP management with role-based access control.
- Built a responsive frontend using **React, React Router, SCSS, and Bootstrap 5** for optimized UI across devices.
- Developed REST APIs using **Node.js, Express.js, MongoDB, and Mongoose** for user accounts, events, RSVP workflows, and profile management.
- Implemented authentication using **express-session, connect-mongo, bcrypt, and cookies** for secure session-based login.
- Developed features including event creation, editing, deletion, RSVP registration/cancellation, and organizer dashboard.
- Integrated search and filtering by **category, city, date, and keyword** to improve event discovery.
- Built **Progressive Web App (PWA)** with service worker and offline support.
- Applied security using **Helmet, CORS, rate limiting, and compression middleware**.
- Deployed on **Render with MongoDB Atlas**, configured environment variables and production setup.

Developer Portfolio Website

Live Demo | GitHub

- Built and deployed a responsive portfolio using **React.js, Vite, JavaScript, HTML5, and CSS3** to showcase projects, skills, and experience.
- Implemented dynamic project rendering using structured JavaScript data for scalability and easy updates.
- Designed project showcase components with screenshots, technology tags, GitHub links, and live demo links.
- Integrated **Formspree contact form** with loading, success, and error states.
- Enhanced presentation using **SEO metadata, Open Graph tags, and responsive layout design**.
- Deployed on **Vercel** with GitHub-based continuous deployment.

Education

Master's in Computer Science (Web Development)
Westcliff University, USA

Mar 2025 – Aug 2026
